

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Randolph WSC has violated the monitoring and reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Chapter 30, Section 290, Subchapter F. Even though these were not emergencies, as our customers, you have the right to know what happened and what we are doing (or did) to correct these situations.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During January 01, 2021 to December 31, 2023 we did not monitor for Lead and Copper and therefore cannot be sure of the quality of your drinking water during that time.

The table below lists the contaminant(s) we did not properly test for during the last year, how often we are supposed to sample for [these contaminants], how many samples we are supposed to take, how many samples we took, when samples should have been taken, and the date on which the follow-up samples were [or will 'bel taken.

Contaminant	Required sampling frequency	Number of samples taken	When samples should have been taken	When samples were or will be taken
Lead and copper tap water sampling	Once every 3 years	10	2021	January-February 2024
Lead and copper entry point sampling				
Water quality parameters				

What is being done'?

We are working to correct the •problem. For more information, please contact Chris Stewart at (903) 568-4760 or PO BOX 540 Celeste, Tx 75423.
